Many animals and structures need to be researched before they are used (only one at a time) and then they can be used in the zoo. The paths are designed automatically logically after the buildings are placed and cannot be edited. Animals include antelopes, bears, binturongs, elephants, flamingos, pits, giraffes, hippos, Komodo dragons, iguanas, lemurs, lions, lizards, macaws, meerkats, mongooses, monkeys, pandas, peacocks, sloths, snakes and turtles. There are several varieties of the same species. The Xbox 360 version contains about 65 animals and the Xbox One version is over 100. Information about each type of animal is stored in the zoo. All adopted animals have a level of two to fifteen. Once they reach the highest level, players can choose to release them into the wild. The Tycoon zoo was released on October 17, 2001About GameAn insidiously addictive simulation game, the zoo Tycoon allows players to create their own zoo, but not just any zoo. It's a completely free form: Start with fences for your exhibits and then pick the animals and give them toys, foliage, and everything else you want. For your customers, you can lay down paths to bring them around and then add food stands, rides, even maps and trash cans. Don't know what you need? The zoo consultants will tell you how to make the animals happy, and the customers themselves will tell you what they are looking for, whether it's snacks, more animals, or something else. There's also a huge amount of background information about each critter-his diet, its habitat and which can be useful when you add a macrauchenia or a Loch Ness monster. In total, you can choose over 100 animals, as well as countless habitats and park decorations. What the zoo does The full collection is particularly compelling with its inclusion of expanding packages of Marine Mania and Dinosaur Digs, so you can add dolphin shows to your zoo, or even a T-Rex or woolly mammoth. Be sure to keep these worn fences though, or you might have a big problem on your hands.
